AC LEIGH

ARCHITECTURAL IRONMONGERS
SECURITY SPECIALISTS

Croft are a family-run business that continues a long-lasting tradition of hand crafting and hand finishing the highest quality architectural hardware.

Founded in 1972 we have a long and distinguished family heritage. Our founder's grandfather first started manufacturing and selling architectural hardware items in 1868. Five generations later, we are still based in Willenhall in the West Midlands, the historic heart of the British lock and hardware industry.

DESIGN

We design all our own products in-house and are constantly inspired by the vast collection of original patterns and dies that have been kept within our founder's family for generations. Croft pride themselves on the level of care and unparalleled attention to detail involved in making tomorrow's antiques - our long-lasting tradition.

Over the course of almost 40 years, we have acquired an unrivalled reputation for excellence. This is built on quality craftsmanship, ability to design and manufacture products to the very highest standards and dedicated customer service. Today, Croft produces some of the most desirable door and window fittings available anywhere.

MADE IN BRITAIN

Croft offer a comprehensive range of British manufactured products, all of which are made by hand by a highly experienced workforce. By combining traditional skills with modern manufacturing techniques, craftsmen produce quality fittings that are built to stand the test of time.

Because each item is traditionally made and finished by hand, it is truly unique. And every item is individually quality checked at the end of the authentic manufacturing process - it doesn't leave the factory until we are totally happy with the smoothness of movement or the final finish.

Finishes marked * are hand produced and can vary in appearance over comparable batches.

Certain products cannot be manufactured in some finishes, please ask your AC Leigh representative for full details on those available for each product.
