PULL HANDLES

AC LEIGH

ARCHITECTURAL IRONMONGERS
SECURITY SPECIALISTS

Croft are a family-run business that continues a long-lasting tradition of hand crafting and hand finishing the highest quality architectural hardware.

Founded in 1972 we have a long and distinguished family heritage. Our founder's grandfather first started manufacturing and selling architectural hardware items in 1868. Five generations later, we are still based in Willenhall in the West Midlands, the historic heart of the British lock and hardware industry.

DESIGN

We design all our own products in-house and are constantly inspired by the vast collection of original patterns and dies that have been kept within our founder's family for generations. Croft pride themselves on the level of care and unparalleled attention to detail involved in making tomorrow's antiques - our long-lasting tradition.

Over the course of almost 40 years, we have acquired an unrivalled reputation for excellence. This is built on quality craftsmanship, ability to design and manufacture products to the very highest standards and dedicated customer service. Today, Croft produces some of the most desirable door and window fittings available anywhere.

MADE IN BRITAIN

Croft offer a comprehensive range of British manufactured products, all of which are made by hand by a highly experienced workforce. By combining traditional skills with modern manufacturing techniques, craftsmen produce quality fittings that are built to stand the test of time.

Because each item is traditionally made and finished by hand, it is truly unique. And every item is individually quality checked at the end of the authentic manufacturing process - it doesn't leave the factory until we are totally happy with the smoothness of movement or the final finish.

We welcome bespoke orders too, and are often commissioned to manufacture specialist items to furnish stately homes, royal palaces, government buildings, castles, stately homes, period, heritage and listed buildings as well as private residences. We also export to many countries around the world, recognised for our authentic British craftsmanship by the most discerning of customers.

Over the years, Croft has been commissioned to manufacture specialist items to furnish many buildings of importance, such as royal palaces, government houses, historic castles and stately homes.

We also supply architectural hardware items to theatres and museums, hotels and private residences. Whether we're asked to replicate a design to match the original as closely as possible or to design and manufacture a new item to an exact specification, our knowledge and experience of manufacturing high quality bespoke fittings using lost wax process or traditional sand casting is unparalleled.

Our products can be produced in a wide variety of finishes, to perfectly simulate or match aged patina or the period and feel of the buildings and location in which they are to be fitted.

Finishes marked * are hand produced and can vary in appearance over comparable batches.

Certain products cannot be manufactured in some finishes, please ask your AC Leigh representative for full details on those available for each product.
