Satin stainless steel

Diameter of lever - 19mm x 26mm

THE KARCHER COMPANY provides door and window handles in addition to an extensive range of pull handles and accessories.

The family-owned company provides an exclusive range of designer door handles and accessories in both stainless steel and zamac. Since 1991, we have been constantly innovating to produce premium designed products to our customers around the world. Our new warehouse was completed in late 2012 and is fully equipped with the latest modern technology including more than 2500 pallet racks. This guarantees a fast and reliable delivery to our distribution partners around the World.

THE MATERIAL

Stainless steel is a modern material whose qualities allow it to be used in a wide variety of areas. KARCHER DESIGN stainless steel door and window handles are manufactured from a high corrosion resistant Chrome-Nickel steel combination Grade "304". This first rate material is resistant to corrosion and environmental influences and is suitable for door and window furniture in both internal and external applications. The surface finish is highly resistant and easy to care for. Karcher Design products are recommended for all door locations in both offices and public buildings.

EPL46Q SEATTLE

Satin stainless steel

Diameter of lever - 19mm x 22mm

SQUARED PERFECTION

Four equal sides and four equal angles, the geometry of the square shows a clear style. Straight lines and angular shapes are an expression on of modern Architecture. This continues in the square roses and rectilinear forms of KARCHER DESIGN door handles, knobs and window handles. Thus, even at the door, the idea of Architects of the design with straight-line elements is realized. KARCHER DESIGN offers an assortment of handles to fulfill this requirement of clean lines and angular shapes. This allows making rooms perfect.
